Mechatronics technician – electrical machinery technician

Your future – your path

We combine passion with career

Are you interested in our large machines and plants and in projects all over the world? Then make a flying start with an apprenticeship at ANDRITZ!

Job description

Your work

As an electrical machinery technician, you will install electrical machines and systems, start them up and carry out maintenance and repair work. You will make windings and coils for generators. You will assemble mechanical, electrical/electronic, pneumatic/hydraulic and IT components. You will troubleshoot faults, find solutions and remedy the faults.

Your skills will be used in energy generation, energy conversion, or in testing and control technology.

Profile of the candidate

Your profile

- Compulsory schooling completed
- Interested in engineering, electrical machinery and electricity
- You can envisage bodies in three dimensions and also draw them
- Your work is clean, precise and reliable
- Quick to comprehend, able to work in a team, and interested in developing your professional skills

What you will learn here

- How mechatronic devices and machines work and how to operate them
- Setting up, starting up and checking mechatronic devices and machines according to instructions and drawings

- Electrical engineering and electrical measuring technology
- Machining of materials, e.g. by simple turning or milling

Page: 3 (total 3)

- Applying all relevant safety regulations for assembly and operation of electrical machinery
- Making and installing electrical windings for high-voltage machinery and generators

You will be trained in our **state-certified apprentice training center**, which has its own training workshops and classrooms, in our production facilities and at vocational school.

As a special benefit, we offer our future skilled workers the opportunity to gain additional qualifications during their apprenticeships, such as a crane-driver's license, training to become a safety officer, or welding and hard-annealing qualifications according to international standards.

Try it out and get to know us

If you're not quite sure what career to choose, whether you fit in with us or we fit in with you, we can simply get to know one another during an info or trial day. If we have aroused your interest, please send an e-mail to lehre.weiz@andritz.com
