

Extending the life of back-up bearings Double the life of your precision leveler back-up bearings

We want to save your life (the life of your leveler bearing that is!)

ANDRITZ Herr-Voss Stamco Inc.'s regrind program consists of eight regrinds instead of four on your back-up bearings. Regrinding costs approximately one-fourth the price of a new bearing, saving you thousands of dollars.

New equipment and improved manufacturing techniques make this precision grinding possible. Receive the quality you have come to expect from ANDRITZ Herr-Voss Stamco Inc. and call us today to personally discuss how to double the life of your precision leveler back-up bearings.

Each bearing is completely:

- Disassembled and cleaned
- Inspected
- Ground
- Reassembled
- Greased
- Size stamped
- Reinspected and packed for shipment
