

Purchase a spare set of back-up supports with pins

Save money and downtime every time you do a roll change.

Costly production downtime can be minimized with a purchase of a spare set of back-up supports with pins. How much is daily production time worth on your processing line \$5,000, \$10,000 or \$15,000? You can save that amount in downtime every time you do a roll change on your ANDRITZ Herr-Voss Stamco Leveler.

Disassembly, inspection, cleaning, repair, and reassembly of your bearings and supports can require 1, 2 or 3 days. Have your back-up bearings assembled on spare supports, ready to go prior to the roll change.

Receive the quality you have come to expect from ANDRITZ Herr-Voss Stamco Inc. and contact us today for pricing.
